(a) Leave-one-group-out: delta vs full RF, paired bootstrap 95% CI
(1000 resamples of the 192 test days, seed 42; CIs unadjusted for 6 comparisons)
delta macro F1
delta F1 Active
full RF minus LOGO RF (positive = removing the group lowers the test score)

(b) Keep-one-group-in: RF trained on one group only
(descriptive, no CI; label = macro F1, F1 Active in brackets)
full RF, 19 features: macro F1 0.5063
majority baseline: macro F1 0.2811
macro F1, RF on the group only
macro F1 on the test set (absolute, non-canonical)
